

SENTINEL

Safeguarding People. Empowering Action.

● ONE CLICK AWAY FROM MITIGATING RISKS.

Sentinel is a **Software-as-a-Service** platform empowering risk managers to deliver duty of care to their employees locally and worldwide, reduce risk exposure and enable effective crisis response.

Built to scale, its architecture supports both single-tenant and multi-tenant environments, making it an ideal solution for

- Fostering resilience,
- Duty of care services, and
- Security information platform.

WHITE LABEL. MAKE IT YOURS. ●

With a comprehensive set of powerful core features and a wide range of add-on modules, the Sentinel offers a robust framework to meet the evolving needs of our clients.

We create a seamless experience for your customers while maintaining your own look and feel. Contact us today to explore the full range of customization options and see how Sentinel can be tailored to your brand.

● **FOUR PRODUCTS IN ONE**

Each enterprise has its unique needs. The Sentinel supports many use cases, designed to address the diverse needs of our customers. Its basic set-up clusters key functions into four segments.

◆◆◆◆ **CORPORATE RESILIENCE SOLUTION** ◆◆◆◆

Enabling organization to anticipate, withstand, adapt to, and recover from disruptions. It integrates risk management, business continuity, crisis response, and employee duty of care into a unified system, ensuring operational stability, protection of people and assets.

◆◆◆ **TRAVEL DUTY OF CARE SOLUTION** ◆◆◆

Automated protection for employees while travelling. It combines risk intelligence, monitoring, communication, and emergency support to protect travellers against health, safety, and security threats, ensuring organisations meet their obligations.

◆◆ **DUTY OF CARE SELF-SERVICE SOLUTION** ◆◆

Providing travel safety and compliance by integrating GPS-enabled location tracking with automated risk alerts, communication tools to ensure that travellers remain visible, informed, and supported throughout their journey.

◆ **SECURITY PORTAL SOLUTION** ◆

A single point of access to all security-related information, tools, and services. By consolidating risk intelligence and communication channels, the solution enables efficient corporate security management and supports the fulfilment of duty of care.

The product segments can be extended with a wide range of add-on modules, allowing organizations to apply a bespoke One-Gate-Approach that matches their unique requirements.

The modular architecture ensures that every customer benefits from a tailored system - combining flexibility, scalability, and efficiency in a single platform.

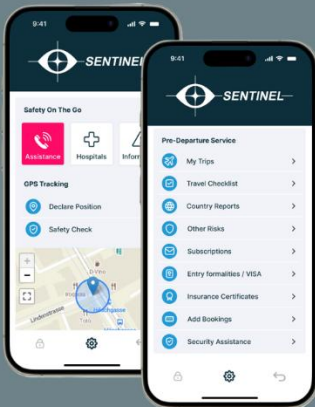

Setting up a comprehensive duty of care ecosystem made easy with seamless integration of your Assistance and Insurance Provider.

MULTILINGUAL ✨

THE SENTINEL CORE MODULES

RISK INTELLIGENCE

For white-label solutions, clients have the flexibility to either leverage the Traxess Risk Intelligence Service for comprehensive, integrated insights or connect their own trusted information provider.

<h3>Country Reports</h3> <p>Essential, up-to-date information to support effective pre-departure preparation.</p>	<h3>City Reports</h3> <p>Concise, relevant insights about specific cities to support on-the-ground decision-making.</p>	<h3>Risk Alerts</h3> <p>Timely notifications about events enabling organizations and individuals to act quickly.</p>
---	---	--

SYSTEM CORE FUNCTIONS

Sentinel provides a powerful management portal designed to support the full range of use cases required for risk mitigation.

<h3>Risk & Crisis Management</h3> <p>See the Risks. Know the Positions. Act with Confidence.</p>	<h3>Assistance</h3> <p>Your Emergency Centre. Your Assistance Provider.</p>	
<h3>Account Manager</h3> <p>Your Account. Your Data. Your Settings.</p>	<h3>Messenger</h3> <p>The Right Message. The Right Audience. At the Right Time.</p>	<h3>Report Generator</h3> <p>Analyse Data into Actionable Insights.</p>

THE POSITION TRACKER

The Position Tracker provides reliable, real-time visibility by using sophisticated tracking logic that combines and prioritises position data from multiple sources. By intelligently evaluating data accuracy, timeliness, and availability, it selects the most reliable location information at any given moment.

Booking Data Tracker

The Automated Tracking Solution!

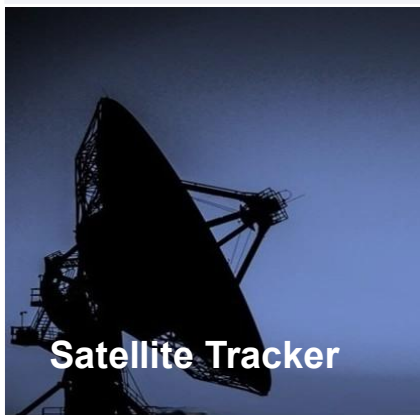

Data from travel agencies consolidated into one trusted source for fully automated services.

GPS-Tracker

Travel Security On The Go!

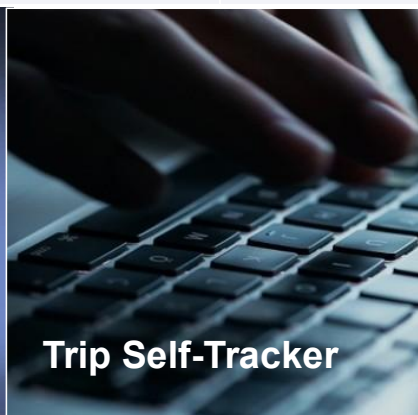

On / Off Tracking Switch
